DIOGENES is seeking for a human being*

Mak, Tin and Velimir as paradigma of the future

International Peace Center, within the frame of International Festival Sarajevo, Sarajevo Winter, together with online magazine DIOGEN pro cultura, prepared the Second Poetry marathon during which all the poets and poetess will, like Diogenes did, search for human being.

Newton's pendulum is trademark of twenty eight International Festival Sarajevo, Sarajevo Winter, powered with the flake of Sarajevo winter, within the leap year of Mayan and Dragon prophecies. Gallery of IPC will welcome poets and poetess from nineteen countries from all around the world within the amazing atmosphere of the house in which used to live the best poet of Bosnia and Herzegovina, Mak Dizdar.

The book in which we are publishing the poems of the participants of the Second Poetry marathon is testimony about the brotherhood of persons in the universe, about which in Sarajevo, with his own life, testified poet Tin Ujević.

We are invoking with this meetings today even poet Velimir Milošević and others, who inspired us to restore Sarajevo poetry marathons.
