## "Armenian Armed Forces have caused an environmental genocide in the occupied territories of Azerbaijan"

PACE Resolution 2085 defends the rights of the Republic of Azerbaijan to be free, sovereign and live in peace and stability with its neighbors, American political expert Peter Tase told Azadinform.

"It is imperative that Azerbaijan and its Autonomous Republic of Nakhchivan acquire a full territorial sovereignty from the agresor state and Government of Armenia" he said.

The expert added that we should remember that Armenia has occupied for over 20 years, the Nagorno-Karabakh region and seven districts that are next to Nagorno-Karabakh region, also it has invaded and occupied over 450 square kilometers that belong to the Autonomous Republic of Nakhchivan, which is an integral part of the Republic of Azerbaijan.

"The world, including Washington DC, should become more familiar with the ongoing Nagorno-Karabakh conflict which is becoming ever more dangerous to the world peace and stability". According to Tase Armenian Armed Forces have caused an environmental genocide in the occupied territories of Azerbaijan.

He underlined that Armenian Troops have destroyed more cultural and archeological sites in Nagorno-Karabakh than the Islamic State has destroyed in Syria.

The world should know about the 25 year long Blockade imposed by the Armenian Brutal Government against the Hard working people of Autonomous Republic of Nakhchivan.

"I just returned from the Autonomous Republic of Nakhchivan, an integral part of Azerbaijan, when you visit the Nakhchivian International Airport you can see on the eyes of every Nakhchivani citizen the suffering and pain caused from the effects of the Blockade of Armenian Government imposed against the Autonomous Republic of Nakhchivan which has shown a remarkable economic progress and Nakhchivan City is a remarkable metropolitan city despite the ongoing hardships that are present due to the consequences of Armenian blockade".

He took this opportunity to call upon the US Government and the White House to seriously consider and embrace, fully support the objectives of this petition.

" If the White House ingores this petition, there will be more devastation and the loss of Azerbaijani civilian lives will further increase. Sarsang Reservoir must be defended with every cost by the International Community in order to prevent an environmental aggression. Unless the International Community acts quickly, I am afraid that Sarsang Reservoir will end up being destroyed just like more than 950 schools, cultural centers and historical treasures of Karabakh that have been burned to the ground by Armenian Armed Forces, that has been causing massive destruction - just like barbarians - in the sovereign territories of Azerbaijan, the very same territories that are recognized by the United States, United Nations Security Council and from all concert of nations" he said.
